## DETAILED ACTION

### *Election/Restrictions*

The applicant's election filed August 19, 2005 is noted. A new, more detailed restriction is now presented.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 12-18, drawn to a method for making a projection screen and a projection screen having multilayer dielectric material deposited on a contoured surface, classified in class 359, subclass 586.
- II. Claims 3-11, 45-49, and 63-75, drawn to dielectric layers between two reflective layers, classified in class 359, subclass 584.
- III. Claims 19-23, drawn to an etalon on an irregular surface, classified in class 359, subclass 589.
- IV. Claims 24-44, drawn to a diffusive projection screen, classified in class 359, subclass 443.
- V. Claims 57-62, drawn to a projection screen having particular lobe reflectance, classified in class 359, subclass 449.
- VI. Claims 50-56, drawn to a method for manufacturing a multilayer projection screen, classified in class 359, subclass 459.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2851

Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the individual inventions have separate utility such as for use in optical devices without the features of the other inventions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-75 are drawn to a plurality of disclosed patentably distinct species comprising a multilayer dielectric, an etalon, and a selective reflective lobe/pattern. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2851

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher E. Mahoney whose telephone number is (571) 272-2122. The examiner can normally be reached on 8:30AM-5PM, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on (571) 272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
